

Endeavour Newsletter - August

BECAPS day

(BBQ, Equipment forms, Commercialisation And Presentation Skills day)

BE THERE!!

When: 11am to Noon on Thursday 18th August.

Venue: Theatre 1. ICT Building, Barry St.

What: Being able to successfully pitch your idea is an important skill. So are report writing, presentation giving and sausage eating. Also, fill in an equipment form for us, so we know how many thousands of power points your group will need on Endeavour Day.

Poster Making

With the weeks rushing past, don't forget to start thinking about your project poster you will need to design. This poster will be stuck up on your booth on Endeavour Day and is integral to your overall presentation. People will flock to the booths that look colourful, interesting and snazzy. So here is the good news and the bad news.

Good news

The IT skills department is holding FREE Photoshop classes. Yes FREE!

All you need to do is go to their website

<http://www.studentit.unimelb.edu.au/itskills/bookings/classes.asp>

And click on '**Photoshop Fundamentals**' and choose a class that suits you. There are classes held throughout August & September.

Bad news

Getting your posters printed will be expensive! Depending on the size (A3 or A2 or A1) and the amount of colour, expect to pay between \$50 to \$100. We recommend the Anatomy and Cell Biology faculty who have poster printing facilities.
