

Sarah Dods
4th year projects for 2007

1. Science Shows for Secondary Schools.

Supervisor: Sarah Dods – Senior Researcher, NICTA

The sponsor of this project is the Melbourne CSIRO Science Education Centre, who run hands-on Science classes and Science & Technology shows that travel to schools with experiments and demonstrations for all year levels. Your task will be to work with CSIRO to develop, design and construct electronic hardware experiments to enhance the content of their shows, which range from photonics to genetics to weather. This project would particularly suit students that were interested in education.
